Energy performance certificate (EPC)

Rules on letting this property

You may not be able to let this property

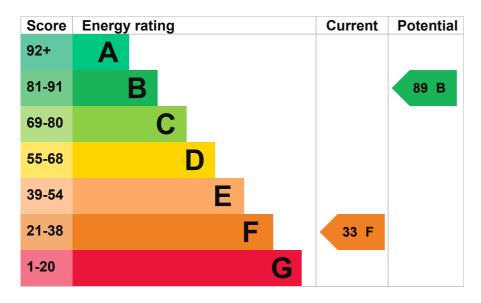

This property has an energy rating of F. It cannot be let, unless an exemption has been registered. You can read <u>guidance for landlords on the regulations and exemptions</u> (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Properties can be let if they have an energy rating from A to E. You could make changes to improve this property's energy rating.

Energy rating and score

This property's energy rating is F. It has the potential to be B.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D

• the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Cavity wall, filled cavity	Good
Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, 200 mm loft insulation	Good
Roof	Flat, insulated (assumed)	Average
Window	Fully double glazed	Average
Main heating	No system present: electric heaters assumed	Very poor
Main heating control	None	Very poor
Hot water	Electric immersion, standard tariff	Very poor
Lighting	Low energy lighting in 43% of fixed outlets	Average
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 498 kilowatt hours per square metre (kWh/m2).

About primary energy use

How this affects your energy bills

An average household would need to spend £1,572 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £1,026 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2015** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 8,140 kWh per year for heating
- 1,842 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is E. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

An average household produces 6 tonnes of CO2 This property produces 5.4 tonnes of CO2 This property's potential production 2.9 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Steps you could take to save energy

▶ Do I need to follow these steps in order?

Typical yearly saving

Step 1: Floor insulation (suspended floor)	
Typical installation cost	£800 - £1,200
Typical yearly saving	£168
Potential rating after completing step 1	39 E
Step 2: Low energy lighting	
Typical installation cost	£20
Typical yearly saving	£14
Potential rating after completing steps 1 and 2	40 E
Step 3: High heat retention storage heaters	
Typical installation cost	£2,000 - £3,000
Typical yearly saving	£752
Potential rating after completing steps 1 to 3	73 C
Step 4: Solar water heating	
Typical installation cost	£4,000 - £6,000
Typical yearly saving	£49
Potential rating after completing steps 1 to 4	75 C
Step 5: Replacement glazing units	
Typical installation cost	£1,000 - £1,400
Typical yearly saving	£42
Potential rating after completing steps 1 to 5	77 C
Step 6: Solar photovoltaic panels, 2.5 kWp	
Typical installation cost	£5,000 - £8,000

£281

Advice on making energy saving improvements

Get detailed recommendations and cost estimates

Help paying for energy saving improvements

You may be eligible for help with the cost of improvements:

- Free energy saving improvements: Home Upgrade Grant
- Insulation: Great British Insulation Scheme
- Heat pumps and biomass boilers: Boiler Upgrade Scheme
- Help from your energy supplier: Energy Company Obligation

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name	David Graham
Telephone	0191 286 9231
Email	angela.duggal@rookmatthewssayer.co.uk

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme	Elmhurst Energy Systems Ltd
Assessor's ID	EES/015439
Telephone	01455 883 250
Email	enquiries@elmhurstenergy.co.uk

About this assessment

Type of assessment	► RdSAP
Date of certificate	28 October 2015
Date of assessment	28 October 2015
Assessor's declaration	No related party

Other certificates for this property
